

DKB Parser Verification Report

Date: December 30, 2025

Test File: 05.12.2025-A0MW0M-ISHSII-GL.CLEAN-ENER.TRA.U.ETF.pdf

Status:  **PARSER WORKING CORRECTLY**

Executive Summary

The DKB PDF parser is **working correctly** with your real PDF file. All transaction data is being extracted accurately. The issue you're experiencing in production is likely due to:

1. **Outdated deployment** - Railway hasn't picked up the latest code
 2. **Build cache** - Old production build is still being served
 3. **Deployment pipeline** - Auto-deploy may not be configured correctly
-

Test Results

PDF Text Extraction

Successfully extracted text from your PDF using `pdfjs-dist` :

```
Auftragsnummer 219905/74.00
Datum 05.12.2025
Rechnungsnummer W00883-0008929406/25
Wertpapier Abrechnung Kauf
Stück 9,2838
ISHSII-GL.CLEAN ENER.TRA.U.ETF REGISTERED SHARES O.N.
IE00B1XNHC34 (A0MW0M)
Schlusstag/-Zeit 05.12.2025 12:06:32
Ausführungskurs 8,336 EUR
Kurswert 77,39- EUR
Provision 1,50- EUR
Ausmachender Betrag 78,89- EUR
Ihr ETF-Sparplan Nr. 10
```

Parsed Transaction Data

```
{
  orderNumber: "219905/74.00",
  invoiceNumber: "W00883-0008929406/25",
  date: "2025-12-05T12:06:32.000Z",
  type: "Sparplan",
  isin: "IE00B1XNHC34",
  wkn: "A0MW0M",
  name: "ISHSII-GL.CLEAN ENER.TRA.U.ETF REGISTERED SHARES 0.N.",
  quantity: 9.2838,
  price: 8.336,
  fees: 1.5,
  totalAmount: 78.89
}
```

Field Extraction Status

Field	Status	Value	Notes
Order Number	✓	219905/74.00	Correctly extracted
Invoice Number	✓	W00883-0008929406/25	Correctly extracted
Date	✓	2025-12-05 12:06:32	Uses Schlusstag/-Zeit field
Transaction Type	✓	Sparplan	Detected as ETF savings plan
ISIN	✓	IE00B1XNHC34	Correctly extracted
WKN	✓	A0MW0M	Correctly extracted from parentheses
Security Name	✓	ISHSII-GL.CLEAN ENER.TRA.U.ETF REGISTERED SHARES 0.N.	Full name extracted
Quantity	✓	9.2838	German number format handled
Execution Price	✓	8.336 EUR	Correctly parsed
Fees	✓	1.50 EUR	Commission extracted
Total Amount	✓	78.89 EUR	Ausmachender Betrag extracted

Regex Pattern Analysis

Current Patterns (Working Correctly)

Field	Regex Pattern	Match Result
Order Number	/Auftragsnummer\s*(\d+\/[\d.]+)\/	✓ 219905/74.00
Invoice Number	/Rechnungsnummer\s*(W\d+-\d+\/\d+)\/	✓ W00883-0008929406/25
Date/Time	/Schlusstag\/-Zeit\s*(\d{2}\.\d{2}\.\d{4})\s+(\d{2}:\d{2}:\d{2})\/	✓ 05.12.2025 12:06:32
Transaction Type	/Wertpapier Abrechnung (Kauf Verkauf)\/	✓ Kauf
Savings Plan	/Ihr ETF-Sparplan Nr.\/	✓ Detected
Quantity	/St[üu]ck\s+(\d,+)\/	✓ 9,2838
ISIN/WKN	/([A-Z]{2}[A-Z0-9]{10})\s*(([A-Z0-9]{6}))\/	✓ IE00B1XNHC34 (A0MW0M)
Name	/St[üu]ck\s+(\d,)+\s*(^[^n]+(?:\n[^n]+)?)\s*IE00\/	✓ Full name
Price	/Ausf[üu]hrungskurs\s*(\d,+)\s+EUR\/	✓ 8,336
Fees	/Provision\s*(\d,)+-?\s*EUR\/	✓ 1,50
Total	/Ausmachender Betrag\s*(\d,)+-?\s*EUR\/	✓ 78,89

 Provision 1,50- EUR
 Ausmachender Betrag 78,89- EUR

Additional Info

Valuta 09.12.2025
 Ihr ETF-Sparplan Nr. 10

Code Status

Current Implementation

- ✓ **File:** server/dkb-parser.ts
- ✓ **Commit:** 1e000a8 - "Replace pdf-parse with pdfjs-dist for robust PDF parsing"
- ✓ **Build:** Production bundle rebuilt and tested
- ✓ **Dependencies:** pdfjs-dist@5.4.530 installed and working

Verification Steps Completed

1. ✓ Extracted text from real DKB PDF
2. ✓ Verified all regex patterns match actual format
3. ✓ Tested parser with real PDF file

4.  Confirmed all fields extracted correctly
 5.  Rebuilt production bundle
 6.  Verified pdfjs-dist in production bundle
-

Why Production Might Still Fail

Possible Causes

1. **Railway Deployment Not Updated**
 - Railway may not have auto-deployed latest commit
 - Manual deployment trigger may be required
 - Build cache might be serving old version
 2. **Environment Issues**
 - Database connection problems
 - Missing environment variables
 - pdfjs-dist not installed in production
 3. **Frontend Not Updated**
 - Client bundle not rebuilt
 - Browser cache serving old version
-

Action Required

For Local Testing

The parser works perfectly locally. You can test it with:

```
cd /home/ubuntu/github_repos/portfolio-dashboard
npx tsx test-dkb-parser.ts
```

For Production Deployment

Option 1: Trigger Manual Deploy

1. Log in to Railway dashboard
2. Select your `portfolio-dashboard` project
3. Click “Deploy” > “Trigger Deploy” manually
4. Wait for build to complete
5. Test DKB upload in production

Option 2: Verify Auto-Deploy

1. Check Railway project settings
2. Verify GitHub integration is active
3. Ensure auto-deploy is enabled
4. Check webhook delivery status

Option 3: Check Environment

1. Verify `pnpm install` runs successfully in Railway
2. Check build logs for pdfjs-dist installation

3. Verify no module loading errors
4. Check health endpoint status

Option 4: Clear Cache

1. In Railway dashboard, go to Settings
2. Clear build cache
3. Trigger fresh deployment
4. Monitor build output

Deployment Verification Checklist

After deploying to production, verify:

- ☐ Railway build completes without errors
- ☐ Health check endpoint responds (`/health`)
- ☐ pdfjs-dist is listed in node_modules (Railway logs)
- ☐ No module loading errors in server logs
- ☐ DKB upload UI is visible in Einstellungen page
- ☐ PDF upload doesn't show "nicht erkannt" error
- ☐ Transaction appears in database
- ☐ Transaction is visible in transaction list

Expected Behavior

Successful Upload Flow

1. User uploads DKB PDF in Einstellungen page
2. Frontend encodes PDF to base64
3. Backend receives PDF and calls `parseDKBPDF()`
4. Parser extracts text with pdfjs-dist
5. Regex patterns extract all fields
6. Transaction is saved to database
7. Frontend shows success message
8. Transaction appears in transaction list
9. Portfolio position is created/updated

Success Indicators

- ☒ Toast message: "DKB-PDF erfolgreich importiert"
 - ☒ Transaction visible in "Importierte Transaktionen" section
 - ☒ Portfolio position updated with new quantity
 - ☒ Current price fetched automatically (if enabled)
-

Test Commands

Test Parser Locally

```
cd /home/ubuntu/github_repos/portfolio-dashboard  
npm run test-dkb-parser
```

Extract PDF Text

```
cd /home/ubuntu/github_repos/portfolio-dashboard  
node extract-dkb-pdf-text.js  
cat /home/ubuntu/dkb-pdf-extracted-text.txt
```

Check Production Bundle

```
cd /home/ubuntu/github_repos/portfolio-dashboard  
grep "pdfjs-dist" dist/index.prod.js
```

Rebuild Production

```
cd /home/ubuntu/github_repos/portfolio-dashboard  
npm run build
```

Conclusion

✅ **The DKB parser is working correctly with your real PDF file.**

All transaction fields are extracted accurately:

- Order number, invoice number, date
- Security details (ISIN, WKN, name)
- Financial data (quantity, price, fees, total)
- Transaction type detection (Sparplan)

Next Step: Ensure your Railway deployment is running the latest code (commit `1e000a8` or later).
