

Railway Deployment Investigation Report

Date: December 30, 2025, 00:04 UTC

Task: Force Railway redeploy for DKB import feature

Summary

Status: ✗ **DEPLOYMENT DID NOT TRIGGER**

The empty commit was successfully created and pushed to GitHub, but Railway has **NOT** redeployed the application. The production site is still serving an outdated build from December 29, 2025 at 23:20:57 GMT.

Tasks Completed

1. Repository Navigation & Status Check

- ✓ Navigated to `/home/ubuntu/github_repos/portfolio-dashboard`
- ✓ Repository is on `main` branch, up to date with origin
- ✓ Verified recent commit history

2. Empty Commit Creation

- ✓ Created empty commit with message: `"chore: trigger Railway redeploy for DKB import feature"`
- ✓ Commit hash: `27627a5814d5b6f3a2556be70e4729ab839a2cb7`
- ✓ Timestamp: December 29, 2025 at 23:56:44 UTC

3. Push to Main Branch

- ✓ Successfully pushed to `origin/main`
- ✓ Push range: `4f0a962..27627a5`
- ✓ GitHub repository updated

4. Wait for Railway Deployment

- ✓ Waited approximately 8 minutes for Railway to deploy
- 🕒 Current time: December 30, 2025 at 00:04:15 UTC
- 🕒 Time since push: ~8 minutes

5. Deployment Testing & Verification

- ✓ Opened production URL: `https://portfolio-dashboard-production-e5c1.up.railway.app/einstellungen`
 - ✓ Tested DKB import section visibility
 - ✓ Searched deployed JavaScript files for "DKB" string
 - ✓ Verified deployed file hashes
-

Detailed Findings

Timeline Analysis

Time (UTC)	Event	Commit
23:20:42	DKB feature implemented	627e34b
23:20:57	Railway last deployed	(from HTTP headers)
23:47:50	Frontend rebuilt with DKB	4f0a962
23:56:44	Empty commit pushed	27627a5  Our commit
00:04:15	Current time	~8 min after push

Production Site Investigation

DKB Import Section: NOT VISIBLE

- Accessed settings page at `/einstellungen`
- Scrolled through entire page
- **Result:** “Käufe & Verkäufe (DKB-PDF Import)” section is **MISSING**
- Only visible sections: Benutzer, PIN-Sperre, Datenübersicht, Backup & Import, Gefahrenzone

JavaScript File Check: NO DKB CODE

- Production JS file: `/assets/index-GmR8Z370.js`
- Searched for “DKB” string across all source files
- **Result: ZERO matches found**
- DevTools search confirmed: “No matches found - Nothing matched your search query”

Local Build: DKB CODE PRESENT

- Local JS file: `/assets/index-Y_IgJXKy.js` (different hash!)
- Searched for “DKB” string in local build
- **Result:** Found in 3 files:
- `dist/public/assets/wasm-CG6Dc4jp.js`
- `dist/public/assets/index-Y_IgJXKy.js` 
- `dist/index.prod.js`

HTTP Headers Analysis

```
HTTP/2 200
last-modified: Mon, 29 Dec 2025 23:20:57 GMT
server: railway-edge
x-railway-edge: railway/us-west2
```

Key Finding: The `last-modified` timestamp is from **23:20:57 GMT**, which is:

- **36 minutes BEFORE** our empty commit (23:56:44)
- **43 minutes BEFORE** current time (00:04:15)

This definitively proves Railway has **not** redeployed since our push.

File Hash Comparison

Location	JavaScript File Hash	Contains DKB?
Production	<code>index-GmR8Z370.js</code>	✗ NO
Local Build	<code>index-Y_IgJXKy.js</code>	✓ YES

Root Cause Analysis

Why Railway Didn't Redeploy

Railway successfully deployed once after the initial DKB feature commit (`627e34b` at 23:20:42), but has **ignored** subsequent commits:

1. `4f0a962` - Frontend rebuild (23:47:50) - **NOT DEPLOYED**
2. `27627a5` - Empty commit trigger (23:56:44) - **NOT DEPLOYED**

Possible Causes

1. Auto-deploy disabled or misconfigured

- Railway's auto-deploy feature may not be enabled for this repository
- Webhook connection between GitHub and Railway may be broken

2. Deployment rate limiting

- Railway may have rate limits that prevent multiple deployments in quick succession
- The first deployment (23:20:57) may have locked subsequent triggers

3. Build cache issue

- Railway may be using cached build artifacts
- The `railway.json` includes cache clearing (`rm -rf dist node_modules/.vite`), but it may not execute if no deployment is triggered

4. Silent deployment failure

- Deployment may have been triggered but failed silently
- No error logs visible without Railway dashboard access

5. Branch mismatch

- Railway may be configured to deploy from a different branch
- However, the initial deployment (23:20:57) suggests `main` is correct

Configuration Review

railway.json

```
{
  "build": {
    "builder": "NIXPACKS",
    "buildCommand": "rm -rf dist node_modules/.vite && pnpm install --frozen-lockfile && pnpm build"
  },
  "deploy": {
    "startCommand": "pnpm start",
    "healthcheckPath": "/health",
    "healthcheckTimeout": 100
  }
}
```

Status: ☒ Configuration looks correct

- Build command includes cache clearing
- Uses NIXPACKS builder
- Proper start command defined

Recommendations

Immediate Actions Required

1. Check Railway Dashboard

- Navigate to Railway project dashboard
- Verify auto-deploy is **enabled** for the GitHub repository
- Check deployment history for failed/skipped builds
- Look for error messages or warnings

2. Manual Deployment Trigger

- In Railway dashboard, click "Deploy" button to force manual deployment
- Select the latest commit (27627a5 or 4f0a962)

3. Verify GitHub Webhook

- Go to GitHub repository settings → Webhooks
- Check if Railway webhook exists and is active
- Verify recent delivery status (should show 200 OK)
- Redeliver webhook if necessary

4. Check Deployment Logs

- Review Railway deployment logs for errors
- Look for build failures or timeout issues
- Verify environment variables are set correctly (especially `OPENAI_API_KEY`)

Alternative Approaches

If Railway continues to fail:

1. Delete and recreate Railway deployment

- Remove current Railway service

- Create new service linked to GitHub repository
- Ensure auto-deploy is enabled from the start

2. Try different deployment method

- Use Railway CLI to manually deploy: `railway up`
- Push to a different branch and configure Railway to watch that branch

3. Contact Railway Support

- If issue persists, this may be a Railway platform issue
- Provide them with:
 - Project ID
 - Deployment timeline
 - Expected vs. actual behavior

4. Consider alternative platforms

- Vercel (already configured in `vercel.json`)
- Render
- Fly.io

Testing Checklist

After successful redeployment, verify:

- [] Production URL shows updated `last-modified` timestamp (should be > 23:56:44)
- [] JavaScript file hash changes from `index-GmR8Z370.js` to `index-Y_IgJXKy.js` (or similar)
- [] Search for “DKB” in DevTools Sources returns matches
- [] Settings page (`/einstellungen`) displays “Käufe & Verkäufe (DKB-PDF Import)” section
- [] DKB PDF upload functionality works correctly
- [] Transaction history displays imported transactions

Conclusion

The empty commit strategy did NOT trigger Railway to redeploy. While the commit was successfully created and pushed to GitHub, Railway’s deployment system has not responded to the push event.

Next step: The user must manually intervene via Railway’s dashboard to either:

- Force a manual deployment
- Fix auto-deploy configuration
- Investigate webhook/connection issues

The DKB import feature is correctly implemented and built locally, but **Railway is still serving a 36-minute-old build** that predates the feature completion.

Report generated: December 30, 2025 at 00:04 UTC

Investigation duration: ~8 minutes

Status: Awaiting manual intervention via Railway dashboard
